## Deep Groove Ball Bearings

### 1. Photo:

### 2. Category:

- Single-Row Deep Groove Ball Bearings
- Single-Row Deep Groove Ball Bearings with shield
- Single-Row Deep Groove Ball Bearings with shield and sealing ring
- Single-Row Deep Groove Ball Bearings with snap ring groove and locating snap ring

In order to meet users' special needs of bearings with low noise (or low vibration) we can provide users deep groove ball bearings with different levels of vibration. Also we can design and manufacture other types of deep groove ball bearings for customers with special requirements.

### 3. Specification:

- Inner diameter: 10~1320mm
- Outer diameter: 30~1600mm
- Width: 9~300mm

### 4. Applications:

Deep Groove Ball Bearings are widely used in the transmission shaft of precision instrument, motor with low noise, automotive machinery and textile machinery, mining machinery, electromechanical equipment, plastics machinery, office machines, medical equipment, sports equipment, common equipment and so on.
